

RINGWOOD

We are often asked for drawings for a bungalow with a garage below the living accommodation and without any stairway to give access to it from inside the building. This saves space and minimizes costs. The Ringwood design meets these requirements, and is based on a bungalow built in Lincolnshire where the site had an old clay pit in the middle of it. This pit just fitted the garage, and everything else went on top. If you want this arrangement remember that there has to be a minimum of 8ft of difference in height between the garage floor level and the floor above it.
